

### Key Learning:

To describe how networks physically connect to other networks

- I can describe the internet as a network of networks
- I can demonstrate how information is shared across the internet
- I can discuss why a network needs protecting

To recognise how networked devices make up the internet

- I can describe networked devices and how they connect
- I can explain that the internet is used to provide many services
- I recognise that the World Wide Web contains websites and web pages

To outline how websites can be shared via the World Wide Web (WWW)

- I can explain the types of media that can be shared on the WWW
- I can describe where websites are stored when uploaded to the WWW
- I can describe how to access websites on the WWW

To describe how content can be added and accessed on the World Wide Web

- I can explain what media can be found on websites
- I can recognise that I can add content to the WWW
- I can explain that internet services can be used to create content online

To recognise how the content of the WWW is created by people

- I can explain that websites and their content are created by people
- I can suggest who owns the content on websites
- I can explain that there are rules to protect content

To evaluate the consequences of unreliable content

- I can explain that not everything on the World Wide Web is true
- I can explain why some information I find online may not be honest, accurate, or legal
- I can explain why I need to think carefully before I share or reshare

### Vocabulary:

internet, network, router, security, switch, server, wireless access point (WAP), website, web page, web address, routing, web browser, World Wide Web, content, links, files, use, download, sharing, ownership, permission, information, accurate, honest, content, adverts
